

Defining column widths

Tables support the same width definitions as standard columns:

- **auto**
- **star**
- **fixed value**

width=100	star-sized	width=200	star-sized
fixed-width cells have exactly the specified width	<i>nothing interesting here</i>	<i>nothing interesting here</i>	<i>nothing interesting here</i>
This is a star-sized column. The next column over, an auto-sized column, will wrap to accomodate all the text in this cell.			I am auto sized.
This is a star-sized column. The next column over, an auto-sized column, will not wrap to accomodate all the text in this cell, because it has been given the noWrap style.			I am auto sized.
