Defining column widths
Tables support the same width definitions as standard columns:

• auto
• star
• fixed value

• fixed value					
width=100	star-sized	width=200	sta	star-sized	
fixed-width cells have exactly the specified width	nothing interesting here	nothing interesting here	not inte	nothing interesting here	
This is a star-sized column. The next column over, an auto-sized column, will wrap to accomodate all the text in this cell.				I am auto sized.	
This is a star-sized column. The next column over, an auto-sized column, will not wrap to accomodate all the text in this cell, because it has been given the noWrap style.			I am auto sized.
